

# Escuela Técnico Maya Design + Construction Update

December 20, 2010 - January 2, 2011

#25

- Poured latrine floor, columns and floor of outer compartment.
- Excavated and prepped for concrete slab that will be hallway and floor of latrine.
- Began retaining wall on N. side of slab, drainage trench with gravel and sand complete.
- Smooth finishes applied to inside of latrine - alisado on back, cob on center and side walls.
- Taza form from peace corps.
- Fixed lower road with neighbors.

1 prepping slab and tires ; 2 holes to tie tires to concrete ; 3 exterior and interior finishes  
4 form work for concrete slab

Plans for next two weeks . . .

- Finish pouring latrine concrete
- Stall framing and trash bottles
- Central bodega walls begun
- Remove forms from W.Bodega, dig down and cob interior
