

Escuela Técnico Maya Design + Construction Update

October 25 - November 7, 2010

#22

- Collected glass bottles in Atnigua. Cut, sorted, cleaned and made glass bricks.
- Laid terra-crete and bottle bricks in the end wall of Workshop 3+4.
- Finished form work for Bodega roof, placed glass bottles in wire mesh.
- Placed window form and began forming windows.
- Began prepping rafters and purlins for patio roof.
- Prepped exterior for cobbling with nails and stuffing trash in between tires.
- 70 students from Antigua volunteered, moving tires, making bottle bricks and cobbling the exterior of the workshops.

1 window forms; 2 bottle bricks; 3 roof form work; 4 moving tires

Plans for next two weeks . . .

- Lay glass bricks @ end walls
- Pour West Bodega roof
- Erect patio roof
- Cobbling and exterior finishes at end wall
