

# Escuela Técnico Maya Design + Construction Update

August 30 - September 12, 2010

#19

- Awnings built @ Workshops 3+4, awnings repaired @ Workshops 1+2.
- Waterproofing paint touched up on Workshop 1,2 and East Bodega.
- Roof canal between Workshop 3+4 built, roof canal between Workshop 1+2 repaired.
- Exposed rebar @ all workshops painted with neat cement.
- Workshop 3 floor dug down and walls cobbled with first layer of cob finish.
- Drain pipe for sink in center bodega placed.
- Patio drainage canal extended to West.
- Metal box built to protect breakers at entry post.
- Design and planning for wood furniture begun.
- Julio came on Saturday, returned his keys and LWH bought Q600 worth of his tools that we would have had to replace otherwise.

Plans for next two weeks . . .

- Buttress
- Dig patio down
- Shower
- Garden
- Remove window forms
- Collect bottles
- Art project
- Finish model
