

Escuela Técnico Maya Design + Construction Update

June 21 - July 04, 2010

- Electrical hook-up trench dug, cable laid, and trench filled.
- Awnings and roof canals touched up and finished @ VT1.
- Zacaton, a water-absorbing reed, planted along southern property edge to help with surface water management. More Cyprus and Pines saplings were also planted.
- Small section of patio roof installed, temporarily @ Workshop 1, until full patio roof can be built.

1 awning at east bodega; 2 zacaton; 3 temporary patio roof; 4 burying electrical line

Plans for next two weeks . . .

- Work at school on hold.
